TEKLYNX
BAR CODE SOFTWARE

TEKLYNX® LABELVIEW™

Add a powerful, easy-to-use barcode label design application to your company's business process that can be used by anyone from beginners to advanced users. LABELVIEW is a sophisticated and intuitive barcode and label design software. With the stability of LABELVIEW's updated platform, you will have the confidence that your software will be dependable today and in the future.
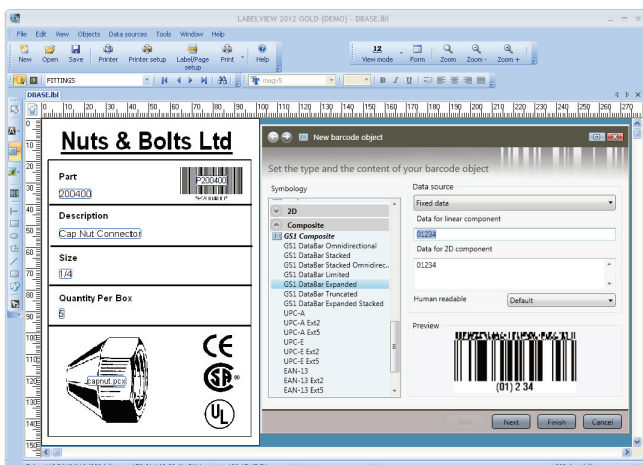

TEKLYNX Subscription Licensing is available for LABELVIEW and is a cost-effective option that keeps your label design process running.

Why Use LABELVIEW?

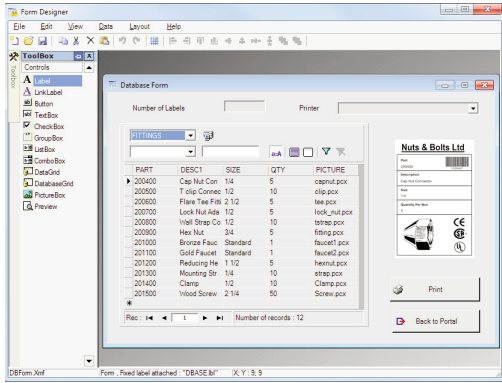

LABELVIEW Interface

- **Easy to Use** – Intuitive interface allows users to quickly become comfortable and efficient using the application.

- **Language Support** – LABELVIEW supports 25 languages within its interface and has the ability to print virtually any language.

GS1 DataBar Expanded

- **Powerful** – 40+ barcode symbologies allow you to easily comply with industry standards.

- **Reliable** – Updated application platform makes LABELVIEW extremely stable.

How Can LABELVIEW Help Solve Your Business Issues?

Form Designer

• **Reduce Time Spent Designing Labels** – LABELVIEW allows you to create labels quickly using wizards, which reduces the overall time spent from initial label design to print time.

• **Reduce Errors** – Form Designer gives you the ability to create custom forms for accurate data entry. LABELVIEW's updated printing interface allows you to preview the label prior to printing, which acts as the final step in quality control.

• **Increase Productivity** – LABELVIEW's redesigned interface, coupled with simplified database connections and streamlined data entry, allows you to design labels and print them in a much shorter period of time.

• **Allows for Easy Entry into Enterprise Printing Solutions** – As your label business grows, you can easily expand your labeling solution. LABELVIEW allows you to transition to TEKLYNX' enterprise products.

Features & Enhancements in LABELVIEW

• Updated Printing Interface   • Data Sources Categories   • Layers Feature   • New Wizards

• Additional Activation Options   • Label Converstion Tool   • Side-by-Side View   • Form Designer

Compare LABELVIEW Editions

• **LABELVIEW Basic** is the entry level version for printing labels without the possibility to connect to a database.

• **LABELVIEW Pro** is recommended for small-scale barcode labeling operations, especially those with manual data input.

• **LABELVIEW Gold** is the high-end edition and includes all features of LABELVIEW Pro along with advanced design tools and no limit to the number of printers you can print to.

Quick Specs

- For Windows® 8/8.1, 7 SP1, XP SP3, Vista SP2, Server 2012/2012 R2, Server 2003 SP2 or 2008 SP2/2008 R2 SP1

- System must have access to Internet or have a dedicated USB port
